Summary

Software Engineer passionate about building scalable systems and solving complex algorithmic problems. Skilled in backend development, database optimization, full-stack applications and Artificial Intelligence. Strong track record in delivering high-performance solutions through competitive coding and real-world projects.

Skills and Technologies

- **Languages:** C, C++, Java, Python, JavaScript, TypeScript
- **Backend Development:** Node.js, Express.js, Spring Boot, REST APIs
- **Frontend Development:** Next.js React.js, React Native, Responsive Design, API Integration
- **Databases:** MySQL, Firebase, Supabase, Oracle DB, Query Optimization
- **AI/ML:** Generative AI Foundations, Prompt Engineering, Google Gemini API, Machine Learning Basics, Model Training
- **Tools and Platforms:** Git, GitHub, Docker, Android Studio, TensorFlow, Figma, OCI

Education

SRM University Delhi NCR, Sonapat

Sept 2023 – July 2027

B.Tech in Computer Science and Engineering - CGPA: 7.06 (Semester 5)

Experience

Front end Developer Intern

Remote / India

Edunet Foundation & IBM-India

Aug 2025 – Oct 2025

- Developed responsive UI components using HTML, CSS, and JavaScript following accessibility and performance best practices.
- Collaborated in a simulated Agile environment using Git workflows and code reviews.

Full Stack Web Development Intern

Remote / India

Future Interns

Dec 2025 – Jan 2026

- Built and improved full-stack features using JavaScript and REST APIs during structured development tasks.
- Applied problem-solving skills to debug issues, optimize performance, and deliver tasks within deadlines.

Projects

Student Management System - C++ CLI Application

[SMS CPP Github](#)

- Developed a command-line based Student Management System using C++ implementing core Object-Oriented Programming concepts.
- Designed and implemented CRUD operations (Add, View, Search, Update, Delete) for efficient student data handling.

Hopeloop - Disaster Communication App

[Hopeloop](#)

- Developed offline-first Android app enabling peer-to-peer messaging without internet for emergency scenarios.
- Implemented SOS alert system and real-time communication features for disaster response.

Verge 2026 - Event Management App

[Verge 2026](#)

- Built and deployed Android application for university tech fest to manage events and enhance user experience.
- Designed intuitive UI and optimized performance for smooth navigation across multiple features.
